Special Article Request: Capital Expense (rev 9.26.24)

# Montague Capital Improvements Committee

#### STM 2.12.25 Town Meeting Report

Approved by the CIC 01/30/2025

## I. Background

The Capital Improvements Committee (CIC) received requests and began meeting with Montague department heads in December 2024 to evaluate capital needs as outlined in their Special Article Requests. The Special Article Request forms that were adopted and implemented in 2017 continue to serve as the framework for outlining and presenting the capital needs of each department.

This year's report of recommendations summarizes the committee's findings following several months of meetings, research, and deliberation and relies upon the same approach to evaluation developed last year. The grading system, explained below, is consistent with that used in past years.

For the February 12 Special Town Meeting, the CIC recommends the timely advancement of 1 capital article.

#### II. Approach to Evaluation of Requested Articles

#### Defined Criteria/Rationale Used in Assessing Special Article Requests

**Public Safety:** Does the capital improvement rectify a safety concern or otherwise prevent a potential public safety issue?

**Cost Avoidance**: Will the capital improvement save the town financially?

**Service Interruption:** Does the capital improvement prevent an interruption in services?

Other- Any other reason identified and relevant by the CIC.

#### **Grading System**

**Recommend:** Given appropriate budget space, the committee believes that the capital improvement should be funded. The CIC evaluation does not formally consider the question of financial capacity, which is left to the Finance Committee and Selectboard.

**Recommend with Reservations:** The committee would generally recommend the capital improvement but may find that elements of the project scope are unclear or incomplete, that it lacks a convincing professional cost estimate, or doesn't address or account for some long-term needs and concerns of the town.

**Does not Recommend:** The committee does not recommend moving forward with the capital improvement as presented. This may be due to the nature or timing of the project, the apparent need for the project, the availability of scope or cost information, or other reasons.

## 1. Summary Table of Fiscal Year 25 Submissions and Recommendations

The table below offers a summary view of special article requests and CIC recommendations for capital project spending. Overall, spending associated with recommended articles equals \$48,500. These recommendations are further explained in section II.

#### **Summary of Final Motions/Recommendations**

| Request                                     | Amount    | Approved | Vote |
|---|-----------|----------|------|
| CWF – Conference Room/Break Room            |           | Х        | 5-0  |
| Renovation (Main Generator Project Phase 2) | \$ 48,500 |          |      |

# 2. Capital Requests Recommended for Consideration at February 12, 2025 Special Town Meeting

Clean Water Facility – Conference Room/Break Room Renovation (Main Generator Project Phase 2) (\$48,500): The CWF is requesting to complete the second phase of its main generator relocation project by refinishing the current generator room to create a new conference space, while converting the current kitchen into an employee break room.

The CWF is currently undergoing Phase 1 of a previously-approved project to remove its generator from the interior of the Administration building, and replace it with one on the outside. The practice of locating generators inside this type of building, while accepted at the time of the facility's construction, is no longer regarded as safe. Phase 1 of this project includes installation of the new generator with accessory electrical equipment and infrastructure, disconnection of the old generator system, excavation and installation of underground duct bank concrete, and various other sitework including the placement or demolition of pads, bollards, pavement drive, and piping.

This request funds Phase 2 of the project, which includes the costs to refinish the current generator room with a mini-split, dropped ceiling, exterior wall repairs, an insulated exterior door, a new kitchen suite, tile floors, and asbestos removal, while work in the updated breakroom includes furnishing with a table, chairs, and file cabinets. Labor will be handled inhouse by CWF staff.

**Cost Avoidance:** CWF staff will be providing the labor for this project in-house as opposed to contracting for construction services, providing significant cost savings.

**Service Interruption, staff safety and productivity:** This second phase will allow the CWF to meet its current department needs, with the timing to begin this phase lining up well with removal of the old generator, scheduled for February 2025.
