Section 1

Introduction

Tighe & Bond has completed a Phase I Environmental Site Assessment of the Strathmore Mill property located at 20 Canal Road in the Turners Falls section of Montague, Franklin County, Massachusetts. The investigation was performed as part of a regional Brownfield investigation being funded through an Environmental Protection Agency (EPA) grant to the Franklin Regional Council of Governments (FRCOG). The assessment was performed in general compliance with the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries and the American Society for Testing Materials (ASTM) Standard E1527-05 for Phase I Environmental Site Assessments and Massachusetts General Laws (MGL) Chapter 21E.

The purpose of the assessment was to identify existing or potential recognized environmental conditions (RECs) associated with current or past activities at the site. A Locus Map, Department of Environmental Protection (MassDEP) Priority Resource Areas map and an Orthophotograph are provided in Appendix A as Figures 1, 2 and 3, respectively. The tasks performed to evaluate the site included:

- An environmental database search, site history and review of local, state and Federal records pertaining to the use, storage and release of petroleum products and hazardous substances in the site vicinity
- A review of Town of Montague's Assessors office, Building Department, Planning, Fire Department and Board of Health Department records
- An environmental liens search
- Historical research
- A review of geological publications and maps for the site area
- A site reconnaissance

1.1 Key Definitions and Acronyms

This section summarizes some of the definitions and acronyms used throughout the report. The definitions have been excerpted directly from the ASTM E1527-05 standard.

- Data Gap - a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.
- Engineering Controls (EC) – Physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on the property. Engineering controls are a type of activity and use limitation (AUL).

- **Environmental Lien** – A charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property.
- **Environmental Professional (EP)** – A person meeting the education, training, and experience requirements as set forth in 40 CFR 312.10 (b).
- **Environmental Site Assessment (ESA)** – The process by which a person or entity seeks to determine if a particular parcel of real property (including improvements) is subject to RECs.
- **Historical RECs** – an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently.
- **Institutional Controls (IC)** – A legal or administrative restriction on the use of, or access of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or ground water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An institutional control is a type of AUL.
- **Reasonably Ascertainable** - information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.
- **Recognized Environmental Conditions (RECs)** – The presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property.

Section 2

General Site Description

Existing conditions at the site and in the surrounding area were evaluated through a reconnaissance inspection of the subject property and a review of Town records. In addition, environmental conditions were evaluated through a review of other records and published mapping of the area surrounding the site.

2.1 Existing Conditions

A description of the site and surrounding properties is presented in the following sections.

2.1.1 Property Description and Site Use

The site is currently owned by the Town of Montague, which took the property from Swift River Group via tax title, in February 2010. The parcel is located at 20 Canal Road in the Turners Falls section of the Town of Montague, Franklin County, Massachusetts and is zoned as Historic Industrial. As previously noted, a Locus Map is provided as Figure 1 in Appendix A.

According to the Montague Assessor's office, the site is listed as Map 2, Block 0, Lot 01, as indicated on the Assessors card and map. A copy of the Assessors card and map are provided in Appendix B. The geographical location of the site is 42°36'33" north latitude and 72°33'39" west longitude. The Universal Transverse Mercator (UTM) coordinates for the site are 700073.617 meters Easting and 4720080.018 meters Northing. The site occupies an area of approximately 2.85 acres and is primarily covered by the mill building.

The subject site consists of 10 contiguous buildings which range in height from four to six stories. The two lower stories are below the elevation of the adjacent canal. The building has a footprint of approximately 55,000 square feet and was constructed in 1877 as a mill. The site is serviced by town sewer and water. The building is generally constructed of brick with rolled roofing materials.

The mill originally consisted of 11 mill buildings, but in May 2007, Building 10, located on the western side of the property, burned to the ground. The fire was started when an employee of the previous owner (Western Properties, Inc.) was removing copper wire from the building.

2.1.2 Surrounding Property Description

The site is located between the Connecticut River and a hydroelectric canal. To the northeast was the Indeck Co-Generation Plant owned by Turners Falls Limited Partnership. The majority of the plant structures have been removed, however, several walls and foundations are still located on the property. The previous owner of the mill stated that the plant has been shut down since the mid-1990s. Southworth Paper is located to the southwest of the site. Residences, a bike trail, and the former Sweeney Ford site are located across the canal to the south. The Sweeney Ford site is vacant, but is being used to showcase community artwork. The opposite bank of the Connecticut River, to the north, is steeply sloped, undeveloped land.

2.2 Area Mapping

Mapping reviewed as part of this investigation included United States Geological Survey (USGS) topographic, surficial geology and bedrock geology maps and Massachusetts Geographic Information System (GIS) mapping.

2.2.1 Topography and Drainage

The site location is illustrated on the USGS Topographic Map for the Greenfield, Massachusetts Quadrangle (Figure 1 in Appendix A). Figure 1 shows that the relatively level site is situated approximately 54 meters above mean sea level.

2.2.2 Site Hydrology

There are no mapped wetlands or surface water bodies located on the site. However, the site is located between the Connecticut River to the north/northwest and a hydroelectric canal to the south/southeast.

Based on the area topography, the location of the Connecticut River and the canal, and our experience with other sites in the area, groundwater flow at the site is expected to be to the southwest.

According to the FEMA Flood Insurance Rate Map, Community-Panel Number 250122 0001 C, dated February 12, 1982, the southeastern portion of the site is located in Zone C, which is identified by FEMA as an area of minimal flooding. The northern and northwestern portions of the site are located in Zone A17, within the 100-year flood zone.

2.2.3 Surficial and Bedrock Geology

According to the *Geologic Quadrangle Maps of the United States, Surficial Geologic Map of the Greenfield Quadrangle, Massachusetts* by Richard H. Jahns (USGS, 1966), the surficial geology of the site is identified as artificial fill. Prior subsurface investigations conducted at the site supported this finding.

According to the U.S. Department of Agriculture, Soil Conservation Service, *Franklin County, Massachusetts Soil Survey* the site is underlain with a soil characterized as Hinckley sandy loam with 15 to 35 percent slopes. Typically, Hinckley loam consists of sandy loam to loamy sand. This soil exhibits rapid permeability and infiltration. Consequently the moisture holding capacity in these units is low.

According to the *Bedrock Geologic Map of the Greenfield Quadrangle, Massachusetts, Bedrock Geology* (USGS, 1952), bedrock beneath the site is identified as the Turners Falls sandstone. This formation is described as thin-bedded, red shaly sandstone, locally micaceous or calcareous. Outcrops of the Turners Falls sandstone were observed in the adjacent Connecticut River.

2.2.4 Surrounding Resource Areas

According to the Mass GIS map (Figure 2 in Appendix A), the site is not located within any potentially productive aquifers, and is not located within a Zone II or an Interim Wellhead Protection Area of a public water supply. Also, no areas of Critical Environmental Concern, Sole Source Aquifers or Solid Waste Landfills were identified within 500 feet of the site. The site is located in an estimated habitat of rare wildlife and endangered species.

2.3 Site Reconnaissance

Tighe & Bond personnel conducted a site inspection at the property on April 9, 2013 with Walter Ramsey, Montague Town Planner. The property was viewed with respect to evidence of releases or potential releases of oil or hazardous materials to site soils and/or groundwater. Photographs of the site are provided in Appendix C.

The site is located between the Connecticut River to the north/northwest and a power canal to the south. The developed area of the site, which occupies the majority of the property, consists of nine connected buildings that contain multiple floors. The buildings vary in height from between four and six stories. Building 11, located on the western side of the mill complex is no longer connected to the other mill buildings. Building 10, which formerly connected Building 11 to the rest of the mill, was destroyed during a fire in May 2007. The location of Building 10 is now an open courtyard area. An access road is located along the south and southeast portions of the property.

The buildings are currently vacant. The building can be heated by two fuel oil boilers located on the first floor of the site building. The buildings are not currently heated with the exception of Building 11. The heat to the buildings is fueled by fuel oil stored in two aboveground storage tanks (ASTs). No other tanks are reportedly located at the site. Six inactive coal boilers, which formerly provided heat to the mill, remain in the boiler room.

Small areas of suspected asbestos containing building materials (ACBM) were observed on top of the coal boilers. In addition, pipe insulation, suspected of containing asbestos, was also observed in several of the upper floors of the mill. The suspected ACBM is well wrapped and in good condition. Consequently, observation of the underlying insulating material was difficult. An asbestos and hazardous materials survey was conducted in 2005 of the building to identify suspect ACBM.

A turbine for hydroelectric generation is located on the first floor. Access to the Swift River Hydro space was not available and this space is not included in the property owned by the Town.

The northern side of the property, adjacent to the Connecticut River, slopes steeply from the mill down the river. The southwest corner of the mill is accessible via a driveway beneath the Southworth Paper Mill. The driveway opens to a small parking area adjacent to a paper testing laboratory owned by Southworth. The former location of Building 10, which is now an open courtyard, is also accessible via the driveway.

Numerous process tanks were observed throughout the site building. The tanks appeared to be empty and in good condition. Oil staining was observed in a few areas of the wood flooring at the site. However, no free liquid was observed adjacent to the staining. No evidence of underground storage tanks (USTs) was observed during the site visit.

2.4 Site History

Town of Montague records indicate that the mill was constructed in 1877 with subsequent additions added in 1892, 1906, and 1918. Historical topographic and Sanborn Fire Insurance Maps were reviewed to identify building locations, previous uses and occupants of the subject site. Turners Falls City Directories and Town files were reviewed to obtain the recent history of the subject property.

The 1884 Sanborn Fire Insurance maps indicate that the property was occupied by the John Russell Cutlery Company and Montague Paper Company at that time. Industrial processes conducted at the cutlery factory included machining, stamping, forging, grinding, and finishing. The Montague Paper Company was located on the northeast portion of the property and industrial operations conducted at the site included pulping, cutting, and bleaching. These operations continued at the property through at least 1895.

The 1902 Sanborn maps indicate that the John Russell Cutlery Company continued to occupy the southwest portion of the property in 1902, but the building area formerly occupied by Montague Paper was subsequently occupied by International Paper through at least 1914.

The 1940 maps indicate that the entire Strathmore Complex was occupied by Keith Paper at that time. The cutlery operation had been removed and processes related to paper making were distributed throughout the site. The Turners Falls City Directories indicate that Keith Paper occupied the site through at least 1945 and Strathmore Paper occupied the site from 1960 through the mid-1980s at which time it was purchased by International Paper. International Paper closed the mill in the mid-1990s. Space was subsequently rented to small commercial businesses until it was purchased by Mr. Scott Jones in either December 2002 or January 2003.

In May 2007, a fire destroyed Building 10. The fire was started when an employee of the previous owner (Western Properties, Inc.) was removing copper wire from the building. During the fire, Building 10 collapsed leaving a pile of debris within the footprint of that building. The cleanup of the debris pile is discussed below.

In 2007, Western Properties sold the site to the Swift River Group who planned to renovate the buildings into a film and television production and education facility. The Town of Montague took the property in 2010 for back taxes and is the current site owner.

2.5 Previous Investigations

Several environmental investigations have been conducted of the subject site.

2.5.1 Phase I Environmental Site Assessment (2003)

In 2003, a Phase I Environmental Site Assessment (ESA) was completed of the subject property using EPA Brownfields Funding. Based on the findings of the Phase I, a Phase II ESA was recommended due to the long industrial history of the site.

2.5.2 Phase II Environmental Site Assessment (2003-2004)

Following completion of the Phase I ESA, a Phase II investigation was conducted to evaluate subsurface conditions at the site using EPA Brownfields funds. Prior to conducting the work, a Quality Assurance Project Plan (QAPP) was submitted to EPA for approval. The scope of work included:

- advancement of nine soil borings
- submittal of eight subsurface soil samples for laboratory analysis
- completion of two soil borings as groundwater monitoring wells

- collection of two groundwater samples for laboratory analysis
- a survey of pertinent site features

The soil analytical data collected during the subsurface investigation at the site was received from the laboratory on September 2, 2003. After reviewing the data it was determined that arsenic and four polynuclear aromatic hydrocarbons (PAHs) were present in soil samples at concentrations that exceeded the applicable Reportable Concentrations (RCS-1). No exceedances were identified in the groundwater samples collected at the site. The site owner was notified of the exceedances in writing on September 19, 2003.

PAHs - Due to the presence of elevated PAHs in four of the samples collected at the site, two of the samples were submitted for analysis by electron microscopy. Coal and coal ash were identified in both of the samples. In addition, wood ash was identified in one of the samples. Based on the identification of coal, coal ash, and/or wood ash and the presence of PAHs as the sole contaminant of concern (i.e., no extractable petroleum hydrocarbons (EPH) carbon fraction exceedances), additional remedial actions were not conducted at this site and notification to MassDEP was not required for these exceedances. In accordance with Section 40.0317(9) of the Massachusetts Contingency Plan (MCP), releases of oil and/or hazardous materials relating to coal, wood ash, and coal ash do not require notification under the MCP. Accordingly, no further response actions were proposed.

Arsenic - Arsenic was identified in one sample at a concentration (32.3 mg/kg) that exceeded the applicable Method 1 Cleanup Standard. However, the calculated Exposure Point Concentration (EPC) or average concentration was well below the applicable standards and a Response Action Outcome (RAO) was prepared and submitted to MassDEP to close out the release.

2.5.3 Asbestos and Hazardous Building Materials Survey (2005)

In March and April 2005, Tighe & Bond conducted a survey at the Strathmore Mill for ACM, lead paint, and various other hazardous materials on March 29, April 4 and April 7, 2005. The survey was conducted to identify easily accessible materials throughout the mill buildings. At the time the survey was conducted the majority of the site was still in-use by Western Properties. Consequently, an invasive demolition survey to identify materials inside walls and other structures was not conducted.

A variety of materials were identified as ACM in various quantities and locations throughout the mill including:

- Transite
- Window glazing
- Window caulk
- Pipe thermal system insulation
- Pipe fitting insulation
- Tar covered insulation
- Boiler seams
- Boiler insulation
- Boiler gaskets

- Floor matting

Estimated quantities of these materials were provided in a table appended to the summary report.

As part of the survey, hazardous materials observed in the buildings were also identified and catalogued. The following items were identified as hazardous materials:

- Light fixtures (mercury light bulbs and polychlorinated biphenyl (PCB) ballasts)
- Hydraulic oil
- Household wastes
- Oils, paints, and cleaners
- Bird guano
- Various process chemicals
- Bio-hazards (decaying material)
- Lead containing paints

2.5.4 Asbestos Clean-up (2013)

Following the fire in May 2007 that destroyed Building 10, a large debris pile of burned building debris remained in the footprint of the former building. A survey of the pile identified ACBM scattered throughout the debris. Consequently, the majority of the pile had to be handled and disposed in accordance with EPA and MassDEP regulations. The Town obtained funding for the work through FRCOG's EPA Revolving Loan Fund and during the Winter of 2012-2013, the pile was removed and disposed of off-site.

Section 3

Environmental Review

3.1 Environmental Records Review

As part of this investigation, Tighe & Bond commissioned a database search of Federal and state records to determine the potential presence of environmental hazards at, or in close proximity to, the subject site. The database search was supplemented by a file review conducted on April 12, 2013 on the MassDEP website to confirm the database information and to review file data not otherwise available in the databases. Local records were also reviewed at the Town of Montague offices as part of this investigation.

3.2 Database File Search

A Federal and state database search for the site and surrounding area was conducted using Environmental Data Resources (EDR) of Milford, Connecticut and is included in their *EDR Radius Map™* report provided in Appendix D. The date of the most recent update by the regulatory agency maintaining each database is listed at the end of the EDR report. Those sites with adequate address information (geo-coded) are plotted on maps provided within the EDR report. Sites with minimal address information (orphans) are listed separately in the report. The orphan sites were reviewed to determine whether they were located in close proximity of the site.

A summary of the Federal and state listings retrieved by the database search is provided at the beginning of the EDR report and in Table 3-1 below. The search distances, which are listed in the table, conform to the minimum requirements of the current American Society for Testing and Materials (ASTM) and All Appropriate Inquiry (AAI) site assessment standards.

As indicated above, sites with minimal address information that may be located in close proximity to the subject site are listed separately in the database report as “orphans.” EDR could not specifically locate these sites due to incomplete or inaccurate addresses. That list (27 sites) has been reviewed by Tighe & Bond to determine which sites are located within the specified database radii. Based on our review, seven of these sites are located within the AAI/ASTM search radius and included in the discussion below.

The site was identified on two databases – spills and state hazardous waste sites. The details of the releases are discussed below.

TABLE 3-1

Database File Search Summary
 Strathmore Mill
 20 Canal Road, Montague, Massachusetts

Database Searched	Search Radius (mile)	Sites Listed
National Priority List	1.0	0
RCRA COR Facilities	1.0	0
State Identified Hazardous Waste Sites	1.0	29
Federal CERCLIS List	0.5	0
State Listed Landfills and Solid Waste Facilities	0.5	0
RCRA TSD Facilities	0.5	0
RCRA Generators – Large and Small Quantity	0.25	0
State Registered UST/AST	0.25	2
Brownfields	0.5	2
Emergency Response Notification System	Subject Property	0
Facility Index System (FINDS)	Subject Property	0

3.3 Database Review

The EDR database was reviewed to determine if the listed sites may present a risk to the subject property. Those state hazardous waste sites identified within 0.25-miles of the subject property are discussed below. If additional information was required to evaluate the potential impact of a site, the documents available on the MassDEP website were reviewed.

State Hazardous Waste Sites

- *Former Strathmore Mill (subject site), 20 Canal Road, Turners Falls*

The subject property was listed as the location of three reportable releases (RTNs #1-13843, 1-15175, and 1-16634).

RTN 1-13843 - On March 21, 2001, approximately 30 to 50 gallons of No. 2 fuel oil was released to the adjacent pavement and a catch basin during a fuel delivery. Speedi Dry was applied to the pavement and the catchbasin was pumped and cleaned. The storm drain discharges to a holding tank in the basement of the building prior to discharging to the Connecticut River. A sheen was reportedly not observed in the tank following the release. A crack in the pavement was reportedly observed in the vicinity of the release and two soil borings, one of which was completed as a monitoring well, were advanced on the site. A Class A-2 Response Action Outcome (RAO) was submitted for the site on July 20, 2001.

RTN 1-15175 - The RTN was issued for the identification of arsenic in soil above a Reportable Concentration. The exceedance was identified during a Phase II Environmental Site Assessment conducted at the site in 2003. The release was closed with a Class B-1 Response Action Outcome without conducting any remediation.

RTN 1-16634 – This RTN was issued for the site following firefighting activities in May 2007. A sheen was observed on the Connecticut River during the May 2007 fire. MassDEP was notified and hired an environmental contractor to deploy absorbents. The release was closed in October 2007 by MassDEP staff.

- *Roadway Spill, 5th Street and J Street, Turners Falls*

This site is a state hazardous waste site (RTN 1-17513). It is located 0.1 miles to the southeast of the site. On July 16, 2009, 20 gallons of diesel fuel were spilled. The site was closed with a Class A-1 Response Action Outcome without the need for remediation. This release is not expected to impact the subject site.

- *Esleeck Paper, Canal Street, Turners Falls*

This site is a state hazardous waste site (RTN #1-11381). It is located adjacent to the subject property to the south (current location of Southworth Paper). On May 23, 1996, approximately 20 gallons of fuel oil was released from a tanker truck to pavement. Sand was applied to the pavement and approximately seven cubic yards of soil were excavated. Contamination was reportedly reduced to background levels and a Class B-1 RAO was submitted on August 17, 1996. It should be noted that, although the site appears to have been properly remediated, the Class B-1 RAO is not the correct class of RAO for this site. The appropriate filing should have been Class A-1. Nonetheless, based on the anticipated direction of groundwater flow and remediation completed at this property, it is unlikely to pose a threat of environmental impact to the subject site.

- *Turners Fall Dam, Turners Falls/Gill line*

This property is a state listed hazardous waste site with multiple RTNs (RTN #1-10686, 1-11602, 1-16274, 1-13859, 1-14733, 1-14808, and 1-18457) that have been issued due to small quantities of hydraulic oil released to the Connecticut River or Canal. The releases have been closed with either B-1 or A-1 RAO's. Based on the small quantities released, this site is not expected to impact the subject site.

- *Dubois Enterprises(Former Sweeney Ford), 2 Third Street, Turners Falls*

This property is a state listed hazardous waste site (RTN #1-0870). It is located approximately 0.14 miles southeast of the subject site. On February 21, 1990, MassDEP personnel responded to and confirmed a report that several of approximately thirty 55-gallon drums were leaking at the rear of 2 Third Street and on the adjacent 60-foot thruway (known as "Paper Street"). Analytical results on the contents of the drums showed that they contained mixed liquid wastes, including spent solvents (chlorinated and petroleum based hydrocarbons, plastic monomers [vinyl acetate and styrene], cyanide, and heavy metals [nickel, zinc, lead, copper and chromium]). The drums were subsequently stabilized and removed from the site. Phase I and II investigations at the site identified volatile organic compounds (VOCs), petroleum hydrocarbons, and metals as the principal contaminants of concern in site soils. Groundwater contamination was only detected in one shallow monitoring well. Approximately 1,000 cubic yards of PCE and petroleum-impacted soils were subsequently excavated by EPA from the site and a Class A-2 RAO was submitted to MassDEP. This site is unlikely to pose a threat of environmental impact to the subject site due to its location relative to the site and the remedial work that has occurred to date.

- *Heritage State Park, Avenue A & First/Second Streets, Turners Falls*

This property is a state listed hazardous waste site (RTN #1-0494). It is located approximately 0.2 miles east of the subject site, across the hydroelectric canal. The release was reported to MassDEP in October 1988 and several separate investigations were conducted to delineate the extent of impact at the property. The contaminants of

concern at the site were elevated concentrations of metals and PAHs in soil. The source of the contamination was identified as coal ash fill. The release was closed out with a Class A-2 RAO in 2005. Based on the location of the release site across the canal this site is not anticipated to impact the subject site.

State Spill Sites

During the 2003 Phase I ESA, 21 spill sites were identified within 1.0 mile of the subject property and the majority were located either downgradient or crossgradient of the site and are not expected to impact the subject property. Six spills have been identified at the Strathmore Mill and four at the adjacent Esleeck Paper (now Southworth) property. Two of the spills, one at the Strathmore Mill (RTN 1-13843) and one at Esleeck (RTN 1-11381) have been assigned RTNs and were discussed in the previous section. The remainder of the spills at these two properties are discussed below.

Strathmore Mill

- W90-0461 – On July 16, 1990, a sheen was noted on the canal adjacent to the site. The source was not identified and no pipes were observed in the vicinity of the sheen. The case has been closed by MassDEP.
- W90-0744 – On November 20, 1990, 40 to 50 gallons of diesel fuel were released when a truck struck a concrete wall and ruptured a saddle tank. Absorbents were applied and 15 cubic yards of contaminated soil were excavated and transported off-site under Bill of Lading. The case was closed on December 3, 1990. No information on the location of the spill at the facility was included in the spill report.
- W91-0260 – On May 13, 1991, 100 gallons of waste lubricating oil was released from a machine and entered a drain. The drain discharged to the Town wastewater treatment plant (WWTP). A vacuum truck removed the oil from the WWTP and the case was closed.
- W92-0084 – On February 29, 1992, 40 to 50 pounds of liquid paper/pulp sludge overflowed from a pipe. The release violated the facilities NPDES permit and MassDEP was notified. The case has been closed by MassDEP.
- W92-0672 – On November 28, 1992, less than 500 gallons of paper machine “white water” was released to the canal when a valve was not completely closed. Normally the water was diverted to the WWTP. The case has been closed.

Esleeck Paper

- W92-0095 – On March 6, 1992, approximately 30 gallons of diesel fuel were released when a truck struck a concrete pier and the saddle tank ruptured. Speedi Dry was applied and the case has been closed.
- W93-0065 – On February 11, 1993, approximately 25 gallons of starch solution was released to surface water when a sump failed. The majority of the release was cleaned with absorbant “towels” and the case has been closed by MassDEP.
- W93-0479 – On September 3, 1993, an unknown gray, silty material was observed on surface water on the east side of the river bank. The “release” was attributed to concrete dust from upstream repairs. The case has been closed.

3.4 MassDEP File Review

A MassDEP file search was conducted via the eDEP website to identify any additional pertinent information for the sites, to verify the relative locations of sites listed in the *EDR Report* and to assess the potential impact to the site from documented releases on any surrounding properties. That information was included in the summary of the release sites discussed above.

3.5 Recorded Environmental Cleanup Liens and Activity and Use Limitations

EDR conducted an environmental liens search of the property title for the subject site. The property title review indicates that there are no environmental cleanup liens recorded in the property title record for the subject site. A copy of the information provided by EDR is included in Appendix E.

3.6 Local File review

As part of our file review, officials in the following Montague municipal offices were contacted by Tighe & Bond personnel: Assessor's, Board of Health, Fire Department, Planning and Building. Site information provided by the Assessor's office was discussed in Section 2.1 of this report and is included in Appendix B. Walter Ramsey, of the Montague Town Planner, accompanied Tighe & Bond staff during the site walk as discussed in Section 2.0.

During the 2003 Phase I ESA, then Chief Raymond Godin of the Turners Falls Fire Department conducted a review of their records. Chief Godin provided copies of a 1990 permit for the installation of a 30,000 gallon tank inside an existing 75,000-77,000 gallon No. 6 fuel oil tank that was originally installed in a coal bunker inside the building. The records indicate that the project was approved by the state fire marshal's office. The fire department records also indicate that a 25,117 gallon tank located in building 6A was pumped and cleaned indicating that the tank may have been abandoned in-place. Chief Godin also reported that the Fire Department records indicated that records were on file for the 2001 fuel oil spill at the site discussed earlier in this section. No additional information on the property was available for review. Copies of the permits and notes regarding the tanks were included in Appendix E of the Phase I Environmental Site Assessment and Response Action Outcome report that was submitted to MassDEP.

On April 16, 2013, Chief Bob Escott indicated that they did not have any additional information regarding site environmental issues in their files.

Records at the Health Department were reviewed on April 9, 2013. There were several records related to a release of waste oil from the mill associated with firefighting activities during the May 2007 fire. During firefighting activities at the site, a sheen was observed on the Connecticut River adjacent to the site. MassDEP was notified and an environmental contractor was hired by MassDEP to apply and maintain absorbents in the area where the sheen was observed. In June 2007, MassDEP issued a Notice of Responsibility to Jerry Jones of Western Properties, Inc. for the release of waste oil.

In October 2007, MassDEP prepared a RAO for the response actions conducted following the fire to close out the release in accordance with the Massachusetts Contingency Plan.

Numerous files were reviewed at the Building Department and the following relevant information was included in those files:

- A Feasibility Study to evaluate potential future site redevelopment options based on the condition of the site was completed in May 2005. The study was conducted by Finegold Alexander and Associates, Inc (Boston, MA), FXM Associates (Mattapoisett, MA), Ajax Investment Partners, LLC (Lexington, MA), Tighe & Bond (Westfield, MA) and Allied Consulting Engineering Services, Inc (Sudbury, MA).
- A February 21, 2006 letter was on file from Swift River Hydro to Jerry Jones of Western Properties informing Mr. Jones that Swift River was taking over the Western Mass Electric (WMECO) account and would be installing a step-down transformer. Once the transformer was energized, the remainder of the Strathmore Mill would be without power unless Western Properties made separate arrangements with WMECO.
- A May 24, 2007, letter to Mr. Jones from the Montague Building Inspector ordered Mr. Jones to cease and desist any additional electrical work on the property. The letter indicated that electrical work was ongoing and no permits had been issued for any electrical work. The Building Department expected to conduct a safety inspection of the site on May 29, 2007.
- A June 12, 2007 memorandum prepared by the Building Inspector indicated that the Strathmore buildings were in an unsafe and dangerous condition due to the lack of operating fire protection systems.
- Since the Town of Montague took ownership of the site, they have worked to activate and update the fire protection systems.

Section 4

Conclusions

Tighe & Bond has completed a *Phase I Environmental Site Assessment* for the Strathmore Mill property located at 20 Canal Road in the Turners Falls section of Montague, Franklin County, Massachusetts. The assessment was performed in general compliance with the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries and the ASTM Standard E1527-05 for Phase I Environmental Site Assessments.

4.1 Findings

The site investigation has revealed the following:

- The subject site is the location of a mill building that occupies the majority of the 2.85-acre property. The site is located between the Connecticut River and a hydroelectric canal. Town of Montague records indicate that the mill was constructed in 1877 with subsequent additions in 1892, 1906, and 1918. The mill was historically occupied by the John Russell Cutlery Company and numerous paper mills. The buildings were most recently occupied by Western Recycling, Inc., which purchased and sold recyclable paper and plastic to overseas markets. Following a fire that destroyed Building 10 in 2007, the building has been vacant. The Town of Montague took the property in 2010 and is the current site owner.
- Numerous process tanks of various sizes were observed throughout the building. The tanks appeared empty and in good condition. The mill is not heated at the current time, but two fuel oil boilers are located on the first floor of the site building. Fuel oil is stored in two fuel oil ASTs located on the site. Six inactive coal boilers, which formerly provided heat to the mill, remain in the boiler room. No other tanks are reportedly located at the site.
- Numerous releases have occurred at the site and adjacent property. However, based on the findings of an environmental assessment completed at the site they have not impacted the underlying soil and groundwater surrounding the mill buildings.
- Several environmental investigations have been conducted on the subject property including a Phase II environmental assessment completed in 2004. At that time elevated concentrations of PAHs and arsenic were identified in soil, but the release was closed out without requiring remediation.
- In May 2007, Building 10 was destroyed by a fire that left a large pile of debris within the footprint of that area of the mill. During the Winter of 2012 - 2013, the debris pile was removed in accordance with applicable state and Federal asbestos and hazardous material regulations.

4.2 Recommendations and Data Gaps

Due to the availability of historical resources it was not possible to determine the site history at five year intervals. However, based on information obtained from historical maps, municipal records and interviews this is not considered to be a data failure.

Based on the identification of asbestos containing building materials at the site, the proper removal and disposal of those materials will be required if additional building renovation or demolition are to be conducted. Paint chips were observed throughout the buildings. These chips may contain lead and any future renovation activities should include proper testing and/or disposal of the material.

In 2003-2004 a Phase II investigation of the site was conducted and the reportable condition identified in soil at the site was closed out in accordance with state regulations. The site has been primarily vacant since that time and no evidence of use of the site that could impact the environmental conditions was identified. Consequently, no additional investigation is recommended.

Several areas of stained concrete were observed inside the site building. The concrete may have been used as machine pads during operation of the mill. If these pads are to be removed during demolition and/or renovation activities, the stained materials should be handled appropriately.

4.3 EPA Checklist

A copy of the completed EPA checklist is included in Appendix G.

Section 5

EP Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional, as provided in 40 CFR 312.10.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The resume for the EPs who conducted the assessment are included in Appendix F.

A handwritten signature in black ink, appearing to read "Nancy E. Milkey". The signature is fluid and cursive, with the first name "Nancy" being the most prominent part.

Nancy E. Milkey, P.G., LSP
Project Manager – Hydrogeology/Associate
Tighe & Bond

Section 7

Limitations

Each report and any and all work product provided in connection with the performance of each environmental site assessment is subject to the following conditions:

1. Each report is prepared on behalf of and for the exclusive use of the Franklin Regional Council of Governments (Client) and is subject to and issued in accordance with the Agreement and the provisions thereof. Each report and any findings contained therein shall not, in whole or in part, be provided to or used by any other person, firm, entity or governmental agency in whole or in part, without the prior written consent of Client and Tighe & Bond. However, Tighe & Bond acknowledges and agrees that, subject to the Limitations set forth herein and prior written approval by Tighe & Bond, a report may be provided to specific financial institutions, attorneys, title insurers, lessees and/or governmental agencies identified by Client at or about the time of issuance of a report in connection with the conveyance, mortgaging, leasing, or similar transaction involving the real property which is the subject matter of a report and any work product. Use of a report for any purpose by any persons, firm, entity, or governmental agency shall be deemed acceptance of the restrictions and conditions contained therein, these Limitations and the provisions of Tighe & Bond's Agreement with Client. No warranty, express or implied, is made by way of Tighe & Bond's performance of services or providing an environmental site assessment, including but not limited to any warranty with the contents of a report or with any and all work product.
2. In preparing a report, Tighe & Bond, Inc. may rely on certain information provided by governmental agencies or personnel as well as information and/or representations provided by other persons, firms, or entities, and on information in the files of governmental agencies made available to Tighe & Bond at the time of the site assessment. To the extent that such information, representations, or files may be inaccurate, missing, incomplete or not provided to Tighe & Bond, Tighe & Bond is not responsible. Although there may be some degree of overlap in the information provided by these various sources, Tighe & Bond does not assume responsibility for independently verifying the accuracy, authenticity, or completeness of any and all information reviewed by or received from others during the course of the site assessment.
3. Unless otherwise noted, a survey (which includes observations, sampling and analysis) for the presence of asbestos-containing materials, mold and/or lead-based paint is not conducted as part of an assessment.
4. No attempt is made to assess the compliance status of any past or present Owner or Operator of a site with any Federal, state, or local laws or regulations, unless specifically indicated otherwise in writing.
5. Findings, observations, and conclusions presented in each report, including but not limited to the extent of any subsurface explorations or other tests performed by Tighe & Bond, are limited by the scope of services outlined in the Agreement, which may establish schedule and/or budgetary constraints for an environmental assessment or phase thereof. Furthermore, while it is anticipated that each

assessment will be performed in accordance with generally accepted professional practices and applicable standards (such as ASTM, AAI, etc.) and then applicable state and Federal regulations, as may be further described in the report and/or the Agreement, Tighe & Bond does not assume responsibility for the impacts of any changes in environmental standards, practices, or regulations subsequent to performance of its services.

6. The assessment presented in each report is based solely upon information obtained or received prior to issuance of the report, including a limited number of subsurface explorations (if performed) made on the dates indicated. If additional environmental or other relevant information is developed at a later date, Client agrees to bring such information to the attention of Tighe & Bond promptly. Upon evaluation of such information, Tighe & Bond reserves the right to recommend modification of this report and its conclusions.
7. If groundwater samples are collected for analysis or water level measurements are made in monitoring wells, such results/observations are provided as representative of conditions at the times stated in this report. Fluctuations in groundwater elevation may occur due to variations in precipitation cycle and multiple other factors, which may influence the concentrations of constituents present in the groundwater. Should additional data become available in the future, such data should be provided to Tighe & Bond for review and Tighe & Bond reserves the right to recommend modification of this report and its conclusions.
8. Except as may be noted specifically within the text of a report, no laboratory testing is performed as part of a site assessment. If such analyses have been conducted by an outside laboratory, Tighe & Bond may rely upon the analyses or data provided, and makes no representation that an independent evaluation of the reliability of such testing has been conducted, with the exception of reviewing standard quality assurance/quality control data that may have been provided with the test results.
9. Although chemical analyses may be performed for specific parameters at specific locations during the course of a site assessment, as described in a report, the results are not definitive regarding the presence of the parameters at other concentrations or the absence of the parameters at other locations on the site. Additional chemical constituents not included in the list of analyzed parameters for a study may be present in soil and/or ground water at a site, and Tighe & Bond assumes no responsibility for chemical constituents or parameters not analyzed.
10. If included, any database search is conducted under the Notice of Disclaimer/Waiver of Liability included in the database search report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed

EXECUTIVE SUMMARY

and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/05/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
DUBOIS PROPERTY	2 THIRD STREET	E 0 - 1/8 (0.068 mi.)	B4	15

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the UST list, as provided by EDR, and dated 01/11/2013 has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State and tribal institutional control / engineering control registries

INST CONTROL: Activity and Use Limitations establish limits and conditions on the future use of contaminated property, and therefore allow cleanups to be tailored to these uses.

A review of the INST CONTROL list, as provided by EDR, and dated 01/11/2013 has revealed that there are 2 INST CONTROL sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 12/10/2012 has revealed that there are 2 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

SOUTHWORTH PAPER TURNERS FALLS MILL (Continued)

1000202055

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MA-EPICS - Massachusetts Environmental Protection Integrated Computer System

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Recipient name: Franklin Regional Council of Governments
Grant type: Assessment
Property name: 151 THIRD STREET
Property #: Map 4, Lot 101
Parcel size: 0.36
Property Description: Former car dealership, service station, small engine repair and autobody shop. Currently, a sculpture studio. In 1986, two USTs were removed. Heating fuel ASTs on site. Database research indicates no known releases or potential contamination sources. Historical recognized environmental conditions identified on site. Subsurface investigation recommended and conducted. Due to historical filling activities that contained ash, lead and PAHs were found in soil on site. The exceedances do not constitute a reportable condition. However, future developers of the site should evaluate soil conditions to determine if the presence of low concentrations of metals and PAHs are inappropriate for the intended use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/01/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: N/A
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 04/10/2013
Number of Days to Update: 12	Next Scheduled EDR Contact: 07/22/2013
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/01/2013	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013

State and tribal Brownfields sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

Date of Government Version: 12/31/2012

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Areas of Critical Environmental Concern Datalayer: The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- ? search for parcel information and/or legal description;
- ? search for ownership information;
- ? research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- ? access a copy of the deed;
- ? search for environmental encumbering instrument(s) associated with the deed;
- ? provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- ? provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

QUITCLAIM DEED

FABULOUS INVESTMENT OPPORTUNITIES LLC, a Massachusetts Limited Liability Corporation with a principal place of business of 20 Canal Road, Turners Falls, Massachusetts, 01376,

for consideration paid, and in full consideration of **FIFTY THOUSAND AND 00/100 DOLLARS (\$50,000.00)**,

grant to **SWIFT RIVER STRATHMORE DEVELOPMENT, LLC**, a Massachusetts Limited Liability Corporation with a principal place of business of 25 Sixth Street, Turners Falls, Massachusetts, 01376,

with **QUITCLAIM COVENANTS**,

the land with the buildings thereon, located in Turners Falls, Montague, Franklin County, Massachusetts, more particularly bounded and described as follows:

SEE EXHIBIT "A" ATTACHED HERETO AND
INCORPORATED BY REFERENCE

Meaning and intending to convey and hereby conveying the same premises conveyed to Fabulous Investment Opportunities, LLC, by deed of Western Properties, LLC, dated MARCH 29, 2008, and recorded at the Franklin County Registry of Deeds in Book 5481,
Page 9.

IN WITNESS WHEREOF, the said FABULOUS INVESTMENT OPPORTUNITIES, LLC, has caused its corporate seal to be hereto affixed and these presents to be signed, acknowledged and delivered in its name and behalf by James L. Bent, its Member and Manager hereto duly authorized, this 28th day of April, 2008.

**FABULOUS INVESTMENT
OPPORTUNITIES LLC**

By: James L. Bent
Its: Manager

COMMONWEALTH OF MASSACHUSETTS

Franklin, ss

April 28, 2008

James L. Bent, Manager, personally appeared before me and acknowledged having signed the foregoing document voluntarily for its stated purpose for FABULOUS INVESTMENT OPPORTUNITIES, LLC. To identify the signatory I relied upon:

- ☒ a driver's license or other state or federal government document bearing a photographic image.
- ☐ an oath or affirmation of credible witness known to me who knows the signatory.
- ☐ my personal knowledge of the identity of the signatory.

David J. Singer, Notary Public
My Commission Expires: 12/27/2013

EXHIBIT A

The land and improvements thereon situated in the Town of Montague, Village of Turners Falls, more particularly described as follows:

That certain parcel of land consisting of approximately 1.917 acres in Montague, Franklin County, Massachusetts, shown as "lot B" on a plan of land title "Plan of Land in Montague (Franklin Co.), MA Prepared for International Paper Company" by Ainsworth Associates, surveyor certified on June 27, 2000 and recorded with the Franklin County Registry of Deeds In Book of Plans 106, Page 69.

Excluding that certain parcel of land with the buildings and improvements thereon, shown as "lot C Area=821 Sq. Ft.)" on a plan entitled "Plan of land in MONTAGUE (Franklin County) MA, Prepared for TURNERS FALLS HYDRO, LLC", dated January 10, 2005, prepared by Ainsworth Associates, endorsed by the Town of Montague Planning Board on January 11, 2005 and recorded in the Franklin County Registry of Deeds at Plan Book 117, Page 25.

Also conveying the perpetual right to use and enjoy loading docks and related facilities located on a parcel of land for as such use and enjoyment as described in instrument at Book 2126, Page 1, more particularly described as follows:

Beginning at the same point of beginning as described in paragraph 1 of Exhibit A to the Notice of Lease recorded in Book 2126, Page 1 (entitled "The Premises"), thence S 1 degree 22' 55" W a distance of 1465.09 feet along the westerly line of the leased premises to an iron pipe, thence easterly on a curve to the west of radius 848.50 feet an arc length of 32.23 feet to a point, thence northerly on a curve to the left of radius 165.00 feet an arc length of 112.13 feet to a point, thence N 60 degrees 24' 03" W a distance of 143.59 feet to the point of beginning which locus is shown on a plan entitled "Plan of Land in MONTAGUE (FRANKLIN CO.), MA, Surveyed for INDECK ENERGY SYSTEMS, INC.", dated June 26, 1987, (sheet 1 of 2 sheets) from the office of C.T. Male Associates and labeled on said Plan "Reserved for Use by Hammermill Mass. Paper Co."

Grantee shall have the option to purchase the land described above from the expiration of the lease upon providing written notice to grantor of grantees exercise of its option not later than expiration date of the lease. The purchase price shall be One Dollar (\$1.00). Title to the land shall close no later than thirty days (30) after grantee's receipt of all zoning and other necessary approvals.

Also conveying the perpetual right to use and enjoy the right of way and related rights along the canal as described in Book 427, Page 100.

Meaning and intending to convey and hereby conveying the same premises conveyed to Fabulous Investment Opportunities, LLC by deed of Western Properties, LLC, dated March 29, 2008, and recorded at the Franklin County Registry of Deeds in Book 5481, Page 9.

ATTEST: FRANKLIN COUNTY, MASS. Joseph A. Gochinski Register

NANCY E. MILKEY, P.G., LSP, R.B.P.
Project Manager, Hydrogeology/Associate

Nancy Milkey is a project manager in the hydrogeology group with 19 years of experience conducting and managing the assessment and remediation of contaminated sites, focusing on brownfields sites in Massachusetts. She specializes in complex sites with extensive contamination issues that require remediation. As a Registered Brownfields Professional (R.B.P.) and Licensed Site Professional (LSP), she has worked on dozens of EPA Brownfields sites assisting communities with environmental concerns at targeted properties. She is also a Professional Geologist (P.G.) in New Hampshire.

Professional Experience

EPA Brownfields

- **EPA Quality Assurance Project Plan (QAPP):** Prepared Tighe & Bond's generic QAPP in accordance with EPA guidance. In addition, developed numerous site-specific QAPP submittals for both EPA hazardous materials and petroleum grant projects in Massachusetts.
- **Franklin Regional Council of Governments Brownfields:** Served as Project Manager and Licensed Site Professional (LSP) for all investigations conducted as part of four EPA Brownfields grants awarded to the Franklin Regional Council of Governments Brownfields program. Completed brownfields and associated Massachusetts Contingency Plan (MCP) reports for submittal to EPA and MADEP for 39 sites in 15 Franklin County communities under these grants.
- **Springfield Underground Storage Tank Remediation:** Prepared MA Leaking Underground Storage Tank grant application for ARRA funding on behalf of the City of Springfield, MA. Received funding and served as Project Manager on \$160,000+ remediation project including the implementation of a remedial program involving the injection of an anaerobic bioenhancing agent into 64 points on the brownfields site.
- **Springfield Brownfields:** Served as LSP/Project Manager for two Springfield, MA Brownfields petroleum assessment grants. Completed ACRES submittals and QAPPs for EPA. Completed MCP and summary reports for eight project areas including Brownfields reports, Response Action Outcomes (RAO), Phase I Completion/Tier Classification, Phase II and Phase III reports.
- **Union Station:** Served as Project Manager and LSP on EPA Brownfields Cleanup project at the Union Station site in Springfield, MA. Concurrently, served as the Project Manager with the Springfield Redevelopment Authority to complete the assessment of separate parcels and surveys of the terminal buildings.

Site Assessment/Hazardous Waste

- **Templeton, MA:** Managed assessment and delineation of soil and groundwater contamination at a 23-acre former mill facility classified as Tier IA under the MCP, involving the release of PCB's and dioxins from an incinerator that impacted groundwater, sediment, and surface water.
- **Danaher Tool Group:** Managed complex Method 3 human health and ecological risk characterization at Delta Park in Chicopee, MA. Investigation included the collection of hundreds of samples from soil, groundwater, surface water and sediment at the site.
- **Danaher Tool Group, Plant #1:** Coordinated subsurface assessment of former industrial facility comprised of five individual plants in Springfield, MA. Prepared audit and MCP documents (Phase II through V, RAO, and Activity and Use Limitation documents) for entire facility.

- **Danaher Tool Group Plant #4:** Drafted Phase II through V reports for a former manufacturing facility in Springfield, MA with an operating pump and treat system consisting of five recovery wells.
- **National Grid:** Audited 24 AULs and Environmental Land Use Restrictions for compliance with the MCP and Rhode Island Department of Environmental Management regulations on behalf of an electric utility client.

Remediation

- **Delta Park, Chicopee, MA:** Managed a team that designed a hydraulic barrier of 23 recovery wells to prevent the release of a fuel oil plume to environmentally sensitive areas adjacent to the Connecticut River. Conducted pilot borings and installed system over a two-month period. Designed a 350-foot containment barrier adjacent to a power generation canal to work with the existing pump and treat system already in place at the site.
- **Pump Testing:** Conducted numerous pump tests of a groundwater recovery system installed in deltaic sediments in Chicopee, MA to determine radius of influence prior to designing hydraulic barrier system expansion.
- **Former Center Service Station, South Hadley, MA:** Managed dual soil vapor extraction and pump and treat system at a former gasoline station prior to achieving a Class A-2 RAO. System was surrounded by soil gas points that were monitored on a regular basis to assess the migration of vapors toward a downgradient residential property. Responsible for the oversight of subsurface investigations to evaluate effectiveness of the remediation system.
- **Massachusetts Turnpike Authority:** Managed the assessment and delineation of a fuel oil/diesel plume at a maintenance area in Blandford, MA. Implemented multi-phase extraction system to address the identified groundwater contamination.

Water Supply

- **Hydrogeology:** Served as senior hydrogeologist on a water supply project at private high school in northern MA. Mapped bedrock outcrops to identify potential water supply well drilling locations.
- **Water Supply Evaluation:** Reviewed available water supply and test well logs to evaluate the potential impact on public supply wells of an adjacent surface water body.

Education and Certifications

- Bachelor of Science, Wildlife Biology, University of Massachusetts Amherst
- Master of Science, Hydrogeology, University of Massachusetts Amherst
- 40-Hour OSHA HAZWOPER Training
- 10-Hour OSHA Construction Safety and Health Training
- MA Emergency Medical Technician

Professional Affiliations

- Massachusetts Licensed Site Professional Association
- Geological Society of America

Checklist

Please indicate that each of the following All Appropriate Inquiries documentation requirements were met for the Phase I assessment conducted at the above listed property:

☒ An ***opinion*** as to whether the inquiry has identified conditions indicative of releases or threatened releases of hazardous substances, and as applicable, pollutants and contaminants, petroleum or petroleum products, or controlled substances, on, at, in, or to the subject property.

☒ An identification of "***significant***" ***data gaps*** (as defined in §312.10 of AAI final rule and §12.7 of ASTM E1527-05), if any, in the information collected for the inquiry, as well as comments regarding the significance of these data gaps. Significant data gaps including missing and unattainable information that affects the ability of the environmental professional to identify conditions indicative of releases or threatened releases of hazardous substances, and as applicable, pollutants and contaminants, petroleum or petroleum products, or controlled substances, on, at, in, or to the subject property.

☒ ***Qualifications and signature*** of the environmental professional(s). The environmental professional must place the following statements in the document and sign the document:

☒ "[I, We] declare that, to the best of [my, our] professional knowledge and belief, [I, we] meet the definition of Environmental Professional as defined in §312.10 of this part."

☒ "[I, We] have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. [I, We] have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Note: Please use either "I" or "We."

☒ In compliance with §312.31(b) of the AAI final rule and §12.6.1 of ASTM E1527-05, the environmental professional must include in the final report an ***opinion regarding additional appropriate investigation***, if the environmental professional has such an opinion.
